You can ask queries related to Lab Activities on the above email.

Activity 1:

Create a GitHub Account. Make a repository with the name “**DSA_Lab**”. Mention the link here after the account creation.

Activity 2:

Write any 15 programs that will explain the concepts of pointers.

In this file, you should place the code and its output screenshot.

After completing the activities, Upload the final pdf and code to the “**DSA_Lab**” repository.

Solution:

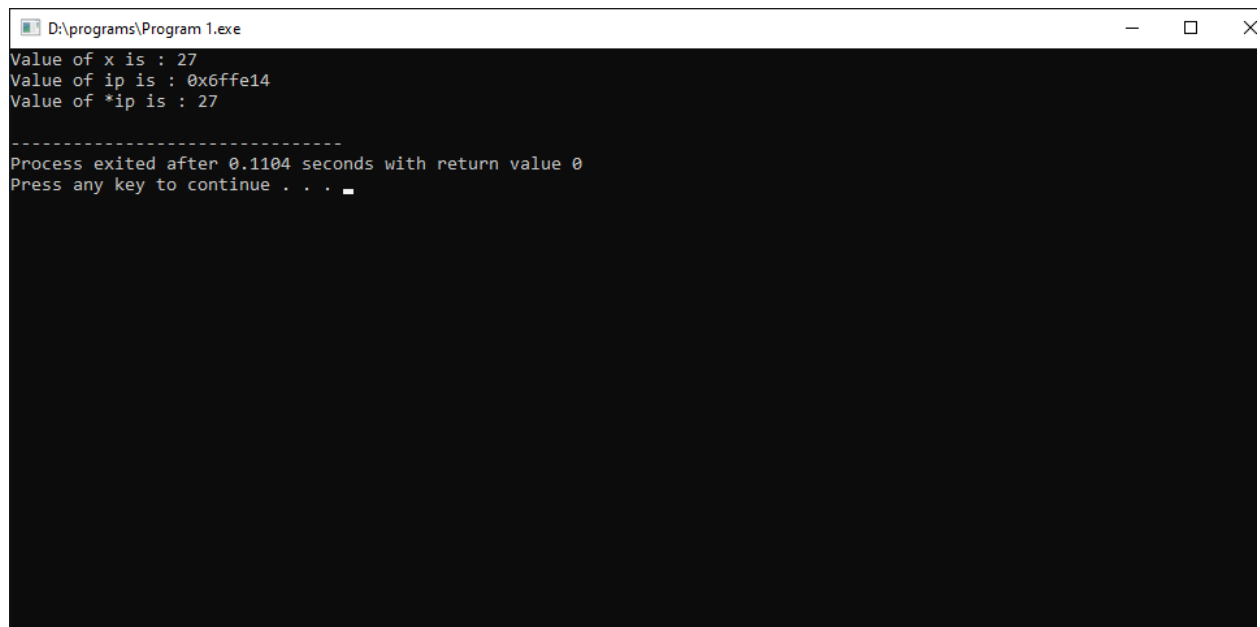

Program 01

```
#include <iostream>
using namespace std;
int main() {
    int x = 27;
    int *ip;
    ip = &x;
    cout << "Value of x is : ";
```

```

    cout << x << endl;
    cout << "Value of ip is : ";
    cout << ip << endl;
    cout << "Value of *ip is : ";
    cout << *ip << endl;
    return 0;
}

```

```
